(54) Title: FILM COMPRISING THERAPEUTIC AGENTS

(57) Abstract: The present invention is related to the composition and methods of manufacture of orally-dissolvable, edible films as a vehicle for the non-invasive administration of nitroglycerin, as well as other therapeutic agents either with or without nitroglycerin, through the mucosal tissues of the oral cavity. The films include a water soluble film-forming polymer such as pullulan. Methods for producing the films are also disclosed.
